

SARGE 2.0 is a UVB protectant that also acts as a green dye marker. SARGE 2.0 is formulated with a proprietary water soluble acid complex to improve the ability of both cool season and warm season turfgrass to withstand the stresses of heat, electromagnetic radiation, drought, and other types of environmental or cultural pressures.

MOST RESEARCHED PIGMENT ON THE MARKET

BENEFITS OF SARGE 2.0 TECHNOLOGY

SARGE 2.0 is a multi-functional spray pigment that provides the turfgrass manager with a set of highly effective, complimentary performances that go beyond other colorants and pigments.

- Highly visible, ultra-rich dark green spray pigment that also provides protection to plants from damaging UV rays
- Increase in photosynthesis proven by university results
- Improves rootzone conditions that lead to healthier and more vigorous plants that are more capable of withstanding environmental stresses
- Safe to turf and the environment

USE DIRECTIONS

DIRECTIONS FOR GENERAL TURF USE

GREENS, TEES, FAIRWAYS, LAWNS AND SPORTS TURF

Mix SARGE 2.0 at the following rates: 190 to 380 ml per hectare (16 to 32 ounces per acre)

Apply SARGE 2.0 at 190 ml. per hectare (16 oz. /A) for Color, Maintenance and Stress protection.

Apply SARGE 2.0 at 190 to 380 ml. per hectare (16 to 32 oz. /A) Prior to Dormant Conditions, Dormancy and for enhanced Color Requirements

Apply in at least 50 gallon of spray water per acre

Do not irrigate immediately after application

Compare SARGE 2.0 to Other Spray Dye Indicators and Colorants

- Ultra-rich green color
- UV Ray protection
- Water soluble acid complex
- Quick dry formulation
- CONTAINS NO UREA
- ECONOMICAL
- Unparalleled wear tolerance
- Exceptional tank mix compatibility

This all adds up to more value for your money!

ENHANCED FORMULATION!

To make SARGE 2.0 even more effective, the opacity of its novel green pigment has been increased, resulting in a darker, ultra-rich green color.
