

CISTERN
SOIL SURFACTANT AND HUMECTANT COMPLEX

FIELD TRIAL REPORT

A field trial was conducted on an apartment complex grounds in Panama City, Florida. Turfgrass was 419 Bermuda. Two locations were chosen that exhibited poor establishment of turf under water stress conditions. Air temperatures were in excess of 90 F throughout the trial. No rainfall occurred during the trial period and very limited irrigation was used.

CISTERN soil surfactant was applied on two sites at 6 oz. per 1000 square feet.
